

I am a Developer and Designer highly experienced in solving performance, accessibility and User experience issues. I spent the last 4 years mobile applications and designing websites and pushing organization forwards.

I also know Front-End Development constraints and I am able to fill the gap between designers and developers in a team, with solution based on Atomic Design and tools like Design System.

### Work Experiences

FREELANCER

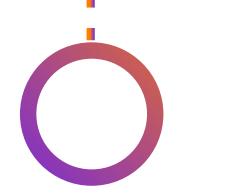

November 2021 - Januray 2022

HPY Camper S

I just completed a project with a team of freelancers for a Swedish client. We had daily meetings and I was in charge of the app UX, and the design of web and mobile applications. I also developed some of the screens in React Native.

September 2021 - Current EMSER.SA

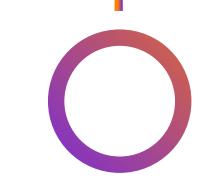

Senior Android Developer

Currently developing a logistic's application for Arcor, it helps the user in the picking and reception of packages. It has a statistics section with data that is synchronized with the web application. I mainly used Flutter in this area.

April 2021 - October 2021 SENZIL S.R.L

( ) Junior Flutter Developer

First steps in Flutter, learning basic structures and working with dynamic components within the mobile environment in Android and iOS.
